

# Federal Flood Risk Management Resources

## Resources Information

Agency: U.S. Geological Survey

Resource: (USGS) Groundwater and Streamflow Information Program (GWSIP)

Overview: Supports USGS federal priority stream gages needed for flood- forecasting and flood response activities, including limited deployment of temporary rapid deployment stream gages (RDGs) needed to monitor water levels at crucial locations, flood-documentation studies, and flood inundation mapping.

Funding Info: 

- Provides core funding for streamflow and flood-data collection efforts at federal priority stream gages and federal matching funds of up to 50 percent for other locations, subject to availability
