

Federal Flood Risk Management Resources

Resources Information

Agency: U.S. Environmental Protection Agency

Resource: (EPA) How's My Waterway - Mobile App

Overview: A mobile web app and website that helps people find information about the condition of their local waterways using a smart phone, tablet, or desktop computer. Map option offers a view of the search area with waters color-coded by assessment status. This information can be useful in identifying flood risk management alternatives that may also benefit impaired waters or protect healthy waters.

Resource Website(s): <http://www.epa.gov/waterdata/how-s-my-waterway>

Keywords: *Individual/Household, Business, Local Government, State Government, Tribal, Preparing for Flood Response, Data & Tools*
