

Federal Flood Risk Management Resources

Resources Information

Agency: NOAA Office for Coastal Management

Resource: (NOAA OCM) Nature-based Solutions for Coastal Hazards

Overview: Training course that prepares coastal planners and managers for planning and implementing green or natural infrastructure projects to reduce coastal natural hazards in their communities. The course consists of two parts: 1) A 45-minute, self-guided online module covers foundational concepts prior to attending the in-person event; and 2) An in-person or virtual one-day event that allows participants to interact with their peers and local experts to develop a green infrastructure strategy.
